August 21	August 24	August 8

Money Matters

As of the last Treasurer's Report on 5/18/26, our club's account balance is \$53,162.63, this includes \$14,205.46 in the H2O Rebuild fund.

TVS Welcomes New Members

TVS welcomes new members Gary Sekhon, Satpal Dhillon, Krystle Dang, and Bryan Embrey. Please say hello and chat with them during our meetings.

2026 TVS Club Star Party Schedule

Save the dates for the 2025 Club Star Parties.

Del Valle star parties are also public outreach events. They are jointly hosted with the EBRPD and held at the Arroyo Staging Area (Coords: 37.6196638, -121.7528899). The public is invited for the first 1.5-2 hours, while club members can stay the remainder of the night.

July 25: Club/public star party at Del Valle Arroyo Road Staging Area. Set-up 8:00pm, Observing from 8:30-10:00pm.

August 15: Club/public star party at Del Valle Arroyo Road Staging Area. Set-up 8:00pm, Observing from 8:30-10:00pm.

August 22: Club/public star party at Del Valle Arroyo Road Staging Area. Set-up 8:00pm, Observing from 8:30-10:00pm.

Tesla Vintners star parties are open to only club members and their guests. These star parties end at midnight, but participants can leave earlier, should they wish.

August 8: Tesla Vintner's Star Party, 5143 Tesla Rd., Livermore. Set-up at 7:30pm, Observing 8:00-Midnight.

October 10: Tesla Vintner's Star Party, 5143 Tesla Rd., Livermore. Set-up at 6:30pm, Observing 7:00pm-11-30pm.

H2O Open House star parties are open to only club members and their guests. The open house ends at midnight, and all participants are encouraged to stay the duration. The drive to H2O takes about 1 hour, and the caravan leaves promptly from the corner of Mines and Tesla Rds. No gas stations are available on the route, so be prepared. Admission is \$3/car-bring exact change. H2O is a primitive site with two porta-potties. Bring water, food, and warm clothing, as needed. Red flashlights are to be used so observers can preserve their night vision.

September 5: H2O Open House, 5:00pm caravan to H2O PROMPTLY leaves the corner of Mines and Tesla Rds., Livermore. Observing until 11:30pm. Meeting times are tentative.

Club Outreach Events

June 22: Outreach star party at Camp Arroyo, 5535 Arroyo Rd Livermore. Set-up 8:00pm, Observing from 8:30-10:30pm. There is a locked gate at the entrance to the site, so you must let me know ahead of time if you plan to come, so we can make sure you have access. <https://www.campgobeyond.org/>

July 5: Outreach star party at Camp Arroyo, 5535 Arroyo Rd Livermore. Set-up 8:00pm, Observing from 8:30-11:00pm. The location is across the road from the Arroyo Road Staging Area. There is a locked gate at the entrance to the site, so you must let me know ahead of time if you plan to come, so we can make sure you have access. <https://www.campgobeyond.org/>

CALENDAR OF EVENTS

June 19, 20, 26, 27, July 3, 4, 10, 11, 17, 18, 7:30-10:30pm

What Free Telescope Viewing

Who Chabot Staff

Where Chabot Space and Science Center, 10000 Skyline Blvd. Oakland, CA 94619

Cost Free

Join Chabot astronomers on the Observatory Deck for a free telescope viewing! Weather permitting, this is a chance to explore stars, planets and more through Chabot's historic telescopes. Chabot's three large historic telescopes offer a unique way to experience the awe and wonder of the Universe. Three observatory domes house the Center's 8-inch (Leah, 1883) and 20-inch (Rachel, 1916) refracting telescopes, along with a 36-inch reflecting telescope (Nellie, 2003).

Are the skies clear for viewing tonight? Viewing can be impacted by rain, clouds, humidity and other weather conditions. Conditions can be unique to Chabot because of its unique location in Joaquin Miller Park. Before your visit, check out the Weather Station to see the current conditions at Chabot.

For more information, see <https://chabotspace.org/events/events-listing/>

WHATS UP

Adapted from Sky and Telescope

All times are Pacific Standard Time

June 2026

21	Sun	Moon is at first quarter; Longest day of the year
23	Tue	At dusk looking west-southwest see the Moon just $4\frac{1}{2}^\circ$ lower left of Spica
25	Thu	At dusk looking low in the west-northwestern sky for Mercury just $3\frac{1}{2}^\circ$ lower right of Jupiter
27	Sat	At dusk looking south-southeast for the moon trailing Antares by just less than 6° as the rise together
29	Mon	Full Moon

July 2026

1	Wed	At dawn Mars is $4\frac{1}{2}^\circ$ lower right of Pleiades
6	Mon	Earth is at aphelion, farthest from the sun.
7	Tue	Moon is at last quarter
9	Thu	Facing west at dusk see Venus about 1° above Regulus
11	Sat	Early morning looking east-northeast to see the Moon, Mars, and Aldebaran in a line each about 5° apart
14	Tue	New Moon
16	Thu	Looking west at dusk, see the Moon just $1\frac{1}{4}^\circ$ below Regulus as the set together
17	Fri	At dusk see the Moon about 6° apart from Venus to the right.

NAVIGATING THE NIGHT SKY FOR MONTH

Navigating the June Night Sky

2026

For observers in the middle northern latitudes, this chart is suitable for early June at 11:30 p.m. or late June near 10:30 p.m.

The stars plotted represent those which can be seen from areas suffering from moderate light pollution. In larger cities, less than 100 stars are visible, while from dark, rural areas well over ten times that amount are found.

Navigating the June night sky: Simply start with what you know or with what you can easily find.

- 1 Extend a line north from the two stars at the tip of the Big Dipper's bowl. It passes by Polaris, the North Star.
- 2 Draw another line in the opposite direction. It strikes the constellation Leo high in the west.
- 3 Follow the arc of the Dipper's handle. It first intersects Arcturus, the brightest star in the June evening sky, then Spica.
- 4 Arcturus, Spica, and Denebola form the Spring Triangle, a large equilateral triangle.
- 5 To the northeast of Arcturus shines another star of the same brightness, Vega. Draw a line from Arcturus to Vega. It first meets "The Northern Crown," then the "Keystone of Hercules." A dark sky is needed to see these two dim stellar configurations.
- 6 High in the east are the three bright stars of the Summer Triangle: Vega, Altair, and Deneb.

Binocular Highlights

- A: Between Denebola and the tip of the Big Dipper's handle, lie the stars of the Coma Berenices Star Cluster.
- B: Between the bright stars of Antares and Altair, hides an area containing many star clusters and nebulae.
- C: 40% of the way between Altair and Vega, twinkles the "Coathanger," a group of stars outlining a coathanger.
- D: Sweep along the Milky Way for an astounding number of faint glows and dark bays.

Astronomical League www.astroleague.org/outreach; duplication is allowed and encouraged for all free distribution.

Tri-Valley Stargazers Membership Application

Contact information:

Name: _____ Phone: _____

Street Address: _____

City, State, Zip: _____

Email Address: _____

Status (select one): _____ New member _____ Renewing or returning member

Membership category (select one): Membership term is for one calendar year, January through December.

_____ Student member (\$10). Must be a full-time high-school or college student.

_____ Regular member (\$30).

Hidden Hill Observatory Access (optional): Must be 18 or older.

_____ One-time key deposit (\$20). This is a refundable deposit for a key to H2O. New key holders must first hear an orientation lecture and sign a usage agreement form before using the observing site.

_____ Annual access fee (\$10). You must also be a key holder to access the site.

Donation (optional):

_____ Tax-deductible contribution to Tri-Valley Stargazers

Total enclosed: \$ _____

Member agrees to hold Tri-Valley Stargazers, and any cooperating organizations or landowners, harmless from all claims of liability for any injury or loss sustained at a TVS function. TVS will not share information with anyone except as detailed in our Privacy Policy (<http://www.trivalleystargazers.org/privacy.shtml>).

Mail this completed form along with a check to: Tri-Valley Stargazers, P.O. Box 2476, Livermore, CA 94551.
